CARING FOR YOUR PUMPING EQUIPMENT

www.ttpumps.com           Tel: +44 (0) 1630 647200
**Service Agreements**
As an owner or operator of a sewage or drainage pumping station, you will want peace of mind that your pumping station operates efficiently, whilst also being environmentally friendly. Our service agreements help to meet these aims and avoid unexpected and costly breakdowns.

With our skilled in-house group of experts and on-site engineers, we are able to offer a comprehensive after sales service to a large number of customers. Provided by the experienced maintenance team at T-T.

**Duty of Care**
Avoid detrimental flooding by ensuring your pumping station is regularly serviced. The owners and operators of pumping stations have a duty of care to ensure minimal environmental damage.

---

**T-T SERVICE**

**SERVICE BENEFITS**
- REDUCED RUNNING COSTS INCLUDING ENERGY AND MAINTENANCE
- GREATER LIFE EXPECTANCY FOR PUMPING EQUIPMENT
- REDUCED RISK OF BREAKDOWN
- BETTER PLANT UTILISATION AND RETURN ON CAPITAL
- IMPROVED ENVIRONMENTAL PERFORMANCE
- PREFERENTIAL TERMS FOR PARTS AND LABOUR, AND PRIORITY RESPONSE FOR SERVICE ATTENDANCE ON-SITE WHEN YOU HAVE A SERVICE AGREEMENT
## Service Levels

</tr>
</tbody>
</table>

- **T-T Level 1**: The standard package includes two services per year for dual pump pumping stations and one service per year for a single pump pumping station.
- **T-T Level 2**: This package includes all the standard package benefits plus our Seer monitoring services. Our monitoring service ensures your station is monitored by T-T 24/7.
- **T-T Level 3**: Our premier agreement includes two services per year, all parts plus one pump per year if required plus two breakdown call outs included.
SERVICE SCHEDULE

Each Service visit to your site includes the following checks. These checks ensure optimum uptime of your equipment and are necessary to maintain the correct working condition of the pumping system.

Checks made during each visit:

- Clean pump
- Check stator case
- Check motor insulation/resistance/continuity
- Check cable condition and security
- Check oil (if contaminated renew mechanical seal /oil)
- Check impeller
- Check wear ring
- Check wear place / suction cover
- Check volute
- Run pump and check bearings
- Check control panel / contactors / sequence
- Clean and check level control system
- Check discharge connection for leaks
- Check pump fixings on guide rail
- Run pump and check running amps
- Check high level warning system
- Check earth bonding
- Check lifting chains
- Check valves
- Check telemetry (if fitted)
- Monitoring equipment
- General site security & safety
- General site condition

Equipment status

- Pump type
- Serial numbers
- Winding resistance
- Insulation resistance
- Capacitors
- Running amps
- Hours run
- Engineers notes

PEACE OF MIND MONITORING

Our monitoring service provides 24/7, 365 days a year monitoring of your pumping equipment, using Seer monitoring units. The Seer units use advanced cloud based monitoring, allowing our in-house pump engineers to continually analyse and monitor your pumping station, ensuring smooth continual running.

HOW IT WORKS

---

EXAMPLE VARIABLES MONITORED
- Power Supply
- High level
- Pump failure:
  - Pump No.1
  - Pump No.2
- Voltage monitoring
- Pump current
- Pump operating
- Pump under-load
- Pump seal leak
- Wet well Level
- Remote control
- Trip reset
- Pump start
- Remote control active

Benefits

- **REDUCED COSTS**
- Reduced maintenance costs due to less unnecessary site visits

- **MAINTENANCE**
- Pro-active maintenance

- **MONITORING**
- Real-time monitoring by a skilled pump engineer

- **SECURE HOSTING**
- Secure hosting of cloud based technology

- **DATA ANALYSIS**
- Historical data analysis and performance trending

- **EARLY INTERVENTION**
- Early intervention to prevent detrimental failures with remote reset and continual monitoring

- **REMOTE RESET**
- Remote reset functionality with on-site engineer safety feature

---

Reduced maintenance costs due to less unnecessary site visits
Pro-active maintenance
Real-time monitoring by a skilled pump engineer
Secure hosting of cloud based technology
Historical data analysis and performance trending
Early intervention to prevent detrimental failures with remote reset and continual monitoring
Remote reset functionality with on-site engineer safety feature
As part of the trialing and testing of the new Seer monitoring range we installed a Seer Advanced unit at a David Wilson Homes site based in Crewe, Cheshire. The 72 property development required an Adoptable Pumping Station due to no gravity sewer network being available.

The Adoptable Sewage Pumping Station provided was compliant with Sewers for Adoption 6th Edition (the applicable specification at the time of construction) to United Utilities addendum. The Seer unit provided managed to alert and diagnose an issue on site within 48 hours of installation.

The Adoptable Pumping Station consisted of a 3.0m diameter by 5.3m deep concrete wet well, separate concrete constructed valve chamber, ductile iron pipe work, valves and fittings to full specification compliance along with a T-T Controls manufactured main control panel, plus two 4kW vortex impeller ATEX approved sewage pumps. Installed into the control panel was a Text-Tel Junior SMS text message only monitoring unit, we added the Seer Advanced cloud based unit to enable us to cross correlate any alarms being received.

Within 48 hours of the Seer unit being installed, the monitoring system detected a stuck non-return valve on one of the pump discharge legs, which ordinarily could have continued to be undetected for a considerable amount of time, causing unnecessary wear on the continually running pump and an imbalance in the hours run on the station. This issue was unknown to both the T-T monitoring department and the site operatives due to the SMS technology being limited to the amount of variables it can monitor. Without the Seer, it would have taken chance to diagnose with an engineer observing on site at the exact time the non-return valve was getting stuck.

In addition we have been able to ‘see’ for the first time, a typical day in the life of each pumping station, in regards to the empty cycles and peak demands to both inflows and operating cycles. This has enabled us to optimise the performance of each pumping station and when combined with our service and monitoring agreement, we have been able to tailor our service and reaction times to suit.

Further to identifying issues specific to the pumping station, the installation of the Seer has allowed us to identify issues, not relating to the equipment provided by T-T but problems with ancillary services, such as issues on the incoming voltage to the pumping station provided by the power supply network and the impact of such issues.

Finally, as well as being a 24/7 real time monitoring and analysis portal, Seer acts as a data logger providing downloadable reports of all data, parameters and alarms.

A document pack can then be produced and supplied to the water authority, as evidence of optimal working conditions to aid with the adoption process.

As this development combined the monitoring equipment, with a T-T service and monitoring agreement we had 24/7 visible data of the pumping station in real time. The categorisation of alarm severity (minor, major and critical) and the ability to visualise the wet well level, continually allowed us to provide a tailored reactive and preventative maintenance package to keep the pumping station in continuous working condition.

The Seer has reduced and will continue to reduce the need for breakdown calls, due to us having the ability to remotely diagnose and reset any issues on site.

“"The development of this product has allowed us to assist not only major house builders in providing evidence of efficient working of the pumping station to aid adoption but has also diagnosed many issues within hours of being installed on sites.”
# QUOTATION AND ACCEPTANCE

**T-T Level 1**

We recommend two services per year for stations serving multiple properties or commercial premises and a minimum of one service per year for single domestic properties.

- **A. Service:** 2 Visits/Year
  - Per Service Visit
  - Tick as applicable

**T-T Level 2**

This package includes all the standard benefits plus our Seer monitoring services. Our monitoring service ensures your station is monitored by T-T 24/7.

- **B. Service:** 2 Visits/Year + Seer Monitoring
  - Per Year
  - Tick as applicable

- **C. Seer model:** Rental
  - Rental Cost Per Year
  - Tick as applicable

- **D. Annual 24/7/365 Monitoring Service**
  - Per Year
  - Tick as applicable

- **E. Monitoring contract period**
  - 2 Years (Subject to RPI)
  - 3 Years (Fixed price)
  - 5 Years (Save 5% per year)

- **F. Seer retrofit**
  - If Seer equipment is not fitted before the pumping station is installed the retrofit charge will apply.

**T-T Level 3**

Our premier agreement includes two services per year, all parts plus one pump per year if required plus two breakdown call outs included.

- **G. Level 3 Service without Seer:**
  - Per Year
  - Tick as applicable

- **H. Level 3 Service With Seer:**
  - Per Year
  - Tick as applicable

ADDITIONAL SERVICES

TANKERING

We can assist in getting your pumping station tankered and jetted with our tankering partners.
Let us take the stress out of arranging and co-ordinating this for you.
T-T only work with professional companies who we have built up good working relationships with and who we trust.
We liaise with the company, book visit, raise purchase orders and pay invoices.
We charge a 15% admin fee on top of the tankering company invoice.
Please note: we are unable to give accurate quotes for this service, as it depends on time on site and disposal amounts.

WATER TESTING

We carry out full water testing backed by full certification for TVC22C, TVC37C, E.coli, Coliforms, Pseudomonas and Legionella.

RETROFIT & COMPLETE PACKAGES

1. Purchase your pumping stations from us
2. Have it installed by our fully trained mechanical and electrical engineers
3. Take the worry out of maintaining a pumping station by taking out a T-T Service Agreement

SEWAGE TREATMENT PLANTS

At T-T, we have British Water accredited sewage treatment plant engineers who can service your sewage treatment plant, ensuring it is in optimal working condition.
What are the benefits of having your sewage treatment plant regularly serviced?
- Trouble-free operation
- Avoid the risk of pollution and potential fines
- Minimise smells
- Reduce energy and running costs
- Improved plant utilisation and return on investment
